Medical Technology

Initial Situation and Requirements

PrivMed® designs ultra-compact tablet presses engineered for the production of personalised medications. These presses are used in pharmacies, medical practices and research institutions, enabling flexible and patient-specific medication.

PrivMed® required a durable and user-friendly interface to simplify the operation of their tablet presses. It had to integrate seamlessly and ensure long-term availability.

Our Solutions and Results

After a thorough analysis of the installation situation, we selected the MK133XAMS monitor model from our standard product range. The device, part of the “S-Line” Design Line, enables flush integration, which not only convinces functionally but also contributes to the modern overall design of the tablet presses.

The 13.3 inch monitor impresses with the following features:

- A 178° horizontal and vertical viewing angle provides clear visibility from almost any angle, making operation easier and enhancing user-friendliness.
- The anti-glare display reduces distracting reflections and ensures optimal visibility, even in bright environments.
- The multitouch display enables quick, smooth interactions and ensures precise, reliable touch inputs.
- The high-quality monitor components guarantee a long lifespan and reduce maintenance and replacement costs.

MIKKA Monitor Solution

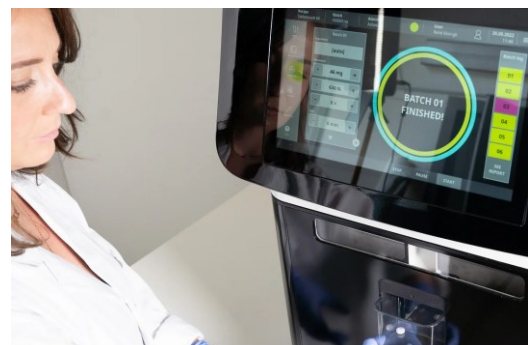

MK133XAMS:

- 13.3 Inch
- Extended Viewing Angle
- Anti Glare
- Multitouch
- Design Line „S-Line“

Customer Benefits

- Long-term planning: MIKKA guarantees the availability of the selected monitor model for 5 years. After this period, MIKKA provides an identical replacement model.
- Short delivery times
- 3-year manufacturer warranty
- Sustainable monitor design ensures easy repairs when needed
- Individual, personal and expert customer support through our sales team in pre- and aftersales.
- Customised solutions, tailored to customer requirements, are feasible.

This is what PrivMed says about our collaboration

"We source our 13.3 inch monitors with anti-glare glass, extended viewing angle and multitouch from MIKKA, which are integrated into our tablet presses. We are happy to have found an innovative and reliable partner for open frame monitors. The personal and professional support, from selecting the right monitor to installation and maintenance, has truly convinced us."

- René Manigk, Co-Founder and CTO, PrivMed® GmbH
